**Soloy Aviation Solutions and Airwork (NZ) Limited Signs
Representation Agreement for Honeywell Powered AS350SD2
Conversion Product Line**

Olympia, WA - March 26, 2007 - Soloy Aviation Solutions signs agreement with Airwork NZ (New Zealand) for AS350 conversion kit sales and support. This agreement confirms Airwork's commitment to operators throughout the region who choose Honeywell LTS101 power for their AS350 helicopters. Airwork's years of experience inspecting and supporting the LTS101 series engine made it an easy decision for Soloy to choose Airwork to represent the new AS350SD2 conversion product line. In addition to Airwork's LTS101 experience, Soloy also recognizes their first hand knowledge of the AS350 fleet operating in Australia and New Zealand as a plus for the promotion of the new Soloy product line.

Airwork New Zealand is ideally positioned to provide complete Soloy AS350SD2 conversion kit installation and support for all its AS350 customers. By combining Airwork's Turbine Support, an approved Honeywell Maintenance Center, and their maintenance / modification skills, Airwork has the ability to carry out upgrades either at the customers' base or the closest Airwork facility. Airwork also is approved by the New Zealand Civil Aviation Authority as a training organization. Airwork New Zealand is administered from the company's central office at Ardmore Airfield, Auckland and has bases throughout New Zealand and Australia.

For more information, contact Airwork (NZ) Limited at +64.9.2952148 or visit Airwork (NZ) Limited online at www.airwork.co.nz

Soloy Aviation Solutions is the industry leader in engine accessory applications and re-engine modifications for helicopters and fixed wing aircraft. In-house capabilities include design, analysis, testing and manufacturing under an FAA approved quality system. In over 35 years, Soloy has obtained multiple certified applications and is currently certifying a new configuration of the Soloy Cessna 206H "Mark 2" with the Rolls-Royce 250-B17F powerplant.
