## **Soloy Aviation Solutions Now Cobham/S-TEC Dealer**

**OLYMPIA, WA** - Soloy Aviation Solutions recently announced that they are now a Cobham/S-TEC dealer. Cobham Commercial Systems, Integrated Systems (formerly S-TEC Corporation) is the world leader in analog and digital autopilot systems.

“Since our Avionics Services became operational two years ago we have experienced increasing interests from general aviation clients (especially Cessna 206 owners converting to our MKII turbo prop) for Cobham/S-TEC autopilot sales, maintenance and repair,” Dave Stauffer, Soloy’s CEO said. “Adding Cobham to our line of dealerships gives us more to offer our fixed wing customers who desire an autopilot configured into their avionics package.”

Soloy is authorized for autopilot, displays and HeliSAS systems in Cobham’s line of avionics products. “The HeliSAS stability augmentation system complements our AS350 engine turbine conversions by dramatically reducing pilot workload while providing precise control during all modes of flight, regardless of wind conditions or shifts in weight,” Stauffer noted, “and Cobham has a wide selection of autopilots and upgrade kits for our fixed wing customers.”

Cobham autopilots are STC’d for over 1,200 fixed wing and helicopter models with more than 35,000 systems installed worldwide. Their main functions are to provide more stable flight, reduce maintenance down-time and reduce costs by using common hardware, servos and sensors. More on Cobham Commercial Systems, Integrated Systems can be found at <http://sharepoint.s-tec.com/default.aspx>.

“Cobham is a perfect fit for Soloy and our clients,” Stauffer added.
